Fax: (802) 241-2979

January, 2006

Dear Vermonter,

This marks the eleventh year of our *Community Profiles*, which annually report latest-available data, over time, on more than 60 indicators of individual, family, and community well-being. The indicators are tied to *10 outcomes*—each a statement of the vision we have for our state and its people. The *Community Profiles* are a key component of an outcomes-oriented approach within the Agency, and is supported by our twelve Regional Partnerships. The Agency's strategic plan, as well as efforts of our many regional partners, will draw on *Community Profile* data, along with other sources of information, to prioritize attention, plan activities, and measure performance. The *Community Profiles* also reflect the partnership between the Agency of Human Services, and the Department of Education and its *School Reports*. Together, these documents provide a status report on key conditions of success in school, and on the family and community well-being that support school success, as required by legislation passed by the 1999 Vermont General Assembly (H. 554, Sec. 100).

The *Profiles* can be a useful starting point for communities wanting to take a broad look at quality-of-life issues, or for those ready to focus on a specific area of concern. In either case, engaged citizens will want to probe beyond these data, to ask "why?," and to seek further sources of information that will add detail to the broad overview presented here. You may want to discuss with your fellow citizens the factors influencing your community's current portrait, and what the community is doing, and can do, together to change that picture. It is important to note that making progress on one indicator is often related to progress on others. Practically, this means that communities may want to extend their consideration beyond their first areas of concern; it also means that there are many "right" ways to do this work.

New with this year's *Profiles* are data from the 2005 Vermont Youth Risk Behavior Survey, including a new indicator: *Percent of students who have an adult in their life they can turn to for help and advice*. Vermont is a national leader in its commitment to measuring assets vital to its young people.

We have dramatically reduced our production of paper copies of the *Community Profiles*. From the Agency of Human Services website (www.ahs.state.vt.us) all *Profiles* are viewable on-line, and complete data tables for all indicators for all *Profiles* are available for download. We hope you will take the opportunity to use this resource in the format that's right for you. And please let us know how it's making a difference in your community.

Sincerely,

Cynthia D. LaWare
Secretary

David Murphey
Senior Policy Analyst

Users' Guide	v
Estimated community population by age-group	1
Outcome: FAMILIES, YOUTH, AND INDIVIDUALS ARE ENGAGED IN THEIR COMMUNITY'S DECISIONS AND ACTIVITIES	2
Indicators:	
Percent of youth who report parents talk regularly with them about school	2
Percent of youth who report they help decide what goes on in their school	2
Percent of eligible population voting in general elections.....	3
Outcome: PREGNANT WOMEN AND YOUNG CHILDREN THRIVE	4
Indicators:	
Percent early prenatal care	4
Percent low birthweight	4
Percent of births where families receive "new baby" visits	5
Infant mortality rate	5
Percent children (ages 0-4) in families receiving welfare	6
Rate of injuries (ages 0-9) resulting in hospitalization	6
Percent of WIC-enrolled children overweight or at risk.....	7
Child mortality rate	7
Outcome: CHILDREN ARE READY FOR SCHOOL	8
Indicators:	
Percent of kindergartners fully immunized	8
Percent of first-graders screened for vision and hearing problems	8
Percent of children ready for kindergarten	9
Percent of standards met for "ready schools"	9
Outcome: CHILDREN SUCCEED IN SCHOOL	10
Indicators:	
School attendance rate	10
Percent of 2 nd graders meeting reading standard	10
New Standards English/Language Arts assessment scores	11
New Standards Math assessment scores	11
Percent of students with special education IEPs.....	12
Estimated percent high school completion	12

Outcome: CHILDREN LIVE IN STABLE, SUPPORTED FAMILIES.....13

Indicators:

Percent children in poverty: 1989	13
Percent children in families receiving Food Stamps (proxy for children in poverty)	13
Percent child support paid.....	14
Percent parentage established for out-of-wedlock child support.....	14
Rate of child abuse and neglect	15
Percent of children (ages 5-17 years) in families receiving welfare.....	15
Rate of out-of-home placements (ages < 18 yrs.).....	16
Average number of moves within the child substitute care system.....	16

Outcome: YOUTH CHOOSE HEALTHY BEHAVIORS17

Indicators:

Percent of students participating in youth programs	17
Percent of students volunteering in their community	17
Percent of students smoking cigarettes within the last 30 days.....	18
Percent of students using alcohol within the last 30 days	18
Percent of students using marijuana within the last 30 days	19
Rate of teen sexually-transmitted diseases	19
Young teen pregnancy rate (ages 15-17)	20
Rate of injuries (ages 10-17) resulting in hospitalization.....	20
Rate of custody for children deemed “unmanageable”.....	21
Rate of court dispositions for delinquency	21
Rate of delinquents in custody.....	22
Rate of teen violent deaths.....	22

Outcome: YOUTH SUCCESSFULLY TRANSITION TO ADULTHOOD23

Indicators:

Percent of high school seniors with plans for education, vocational training, or employment.....	23
Percent of graduating high school seniors who continue their education within six months	23
Percent New Families at Risk.....	24
Rate of out-of-home placements (ages 18-24).....	24
Rate of injuries (ages 18-24) resulting in hospitalization.....	25
Rate of teen non-violent deaths	25

Outcome: ADULTS LEAD HEALTHY AND PRODUCTIVE LIVES	26
Indicators:	
Rate of injuries (ages 25-64) resulting in hospitalization	26
Percent of adults who smoke cigarettes	26
Percent of adults who are “binge drinkers”	27
Rate of suicide (ages 18+)	27
Percent of people above poverty level, 1989	28
Average median family income, 1989	28
Average annual wage	29
Rate of job creation	29
Rate of employment	30
Percent of adults (ages 18+) receiving welfare	30
 Outcome: ELDERS AND PEOPLE WITH DISABILITIES LIVE WITH DIGNITY AND	
INDEPENDENCE IN SETTINGS THEY PREFER	31
Indicators:	
Percent of population aged 65+ in poverty, 1989	31
Rate of injuries (ages 65+) resulting in hospitalization	31
Percent of population aged 65+ at risk for depression	32
Rate of adult abuse and neglect victims	32
Percent successful job placements among consumers of Vocational Rehabilitation	
services	33
Balance of institutional and home & community-based options	
for long-term care	33
 Outcome: COMMUNITIES PROVIDE SAFETY AND SUPPORT TO FAMILIES AND	
INDIVIDUALS	34
Indicators:	
Percent of youth who feel valued by their community	34
Percent of youth who have an adult who provides help and advice	34
Rate of out-of-home placements (ages 25+)	35
Rate of petitions filed for Relief From Domestic Abuse	35
Rate of violent crime	36
Rate of sexual assault	36
Percent living in affordable housing	37
Percent met need for child care	37
 Technical appendix	38
Indicator sources and explanatory notes	46
40 Developmental Assets	52

USERS' GUIDE

“Community” is a term that means different things, depending on one’s purposes. Here, our “working definition” of community is the area served by a **school supervisory union**. This is a unit meaningful to children and families; small enough to be considered truly “local”; and usually large enough to avoid some of the problematic issues associated with very small populations. Where supervisory union data are unreliable or not available, we present data at the state and county levels only. For supervisory unions that cross county boundaries, assignment was made to the county containing the majority of the population.

Generally, the most meaningful and useful comparisons for a community are with itself, over time. However, for each indicator, we also present data for the state as a whole, and for the county, to provide additional context for comparisons. For some indicators, statewide goals, set out in *Healthy Vermonters 2010*, are also identified.

Wherever practical, we present rates as well as counts for each indicator. **Rates** (for example, percents, or rates per 1000 population) adjust for the varying size of populations. Population figures used in calculating rates are estimates, not exact counts; therefore, the rates shown here are also estimates. Because numbers (or counts) at a community level (and sometimes even at a county or state level) are likely to be small, even small year-to-year changes can have dramatic effects on rates. In order to provide a more reliable basis for planning, therefore, we calculate some community-level numbers and rates using rolling 3-year averages. In such cases, the label “1995,” for example, refers to the average of the years 1993 to 1995; “1996” refers to the average of 1994 to 1996.

In the back of the report we provide detailed notes and statistics on the indicators, including (where appropriate) the actual numerators and denominators used to calculate the rates, and “95% confidence ranges.” The confidence range, similar to a “margin of error,” represents the **range** of values within which the “true,” or underlying, rate is likely (with no more than a 5 percent rate of chance) to fall. If the confidence ranges for any two rates for a given indicator (e.g., state and county, county and community) **overlap** (share values in common), they are **not** significantly different, statistically speaking. However, statistical significance is **only one factor** communities may want to consider as part of their assessment and planning.

This project reflects the cooperation of many people in the Agency of Human Services, and partners elsewhere in state government. We are grateful for all their efforts in providing this information; original data sources are noted in the back of the report. However, responsibility for the accuracy of the data here rests with the Agency of Human Services, Planning Division.

The *Profile* is a “work-in-progress.” As communities consider and use the data, you will tell us how to make it better, more useful. We welcome your comments and suggestions.

Year: 1986	50.4	49.4	48.7	3,016
Year: 2004	64.8	65.3	72.5	5,707

Measuring consumer and citizen participation in the life of their communities, while vitally important in achieving the other outcomes, is difficult to measure from a distance. This is an area where communities will take the lead in identifying additional indicators. A list (by no means complete) of some measures for which communities might collect data locally follows:

- Number of hours volunteered in community service*
- Readership rates at local libraries*
- Number of adults involved in mentoring programs*
- Participation at Town Meeting and other community forums*
- Students involved in "service learning"*
- Attendance at civic events (games, concerts, theater, etc.)*
- Participation in civic and non-profit organizations, clubs, and sports teams*
- Number of positions in local elections that are contested*
- Number of people obtaining Community Leadership Training, or other "empowerment" experience*

County: Addison; AHS District: Middlebury

Indicator Sources and Explanatory Notes:

Estimated community population by age-group: These are estimates, not exact counts, prepared from Census Bureau estimates, together with estimation models based on regression techniques. Source: Vermont Department of Health.

Percent of students whose parents talk with them regularly about school: Youth who report that their parents talk with them at least once a week about school. Data are limited to students who participated in the survey, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Health, Office of Alcohol & Drug Abuse Programs; and Vermont Department of Education, *Youth Risk Behavior Survey*.

Percent youth who participate in school decision-making: Surveyed youth who “agree” or “strongly agree” with the statement, “Students help decide what goes on in my school.” Not all schools participated in the survey. Data refer to all surveyed students, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Health, Office of Alcohol & Drug Abuse Programs; and Vermont Department of Education, *Youth Risk Behavior Survey*.

Percent youth who report they help decide what goes on in their school: Surveyed youth who “agree” or “strongly agree” that they “help decide what goes on in my school.” Data are limited to students who participated in the survey, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Health, Office of Alcohol & Drug Abuse Programs; and Vermont Department of Education, *Youth Risk Behavior Survey*.

Percent of eligible population voting in general elections: Eligible population is considered to be residents aged 18 and older. Sources: Vermont Office of the Secretary of State; Vermont Department of Health, Population Estimates.

Percent early prenatal care: Those women giving birth who report receiving prenatal care beginning in the first three months of pregnancy, as a percent of all women giving birth who report on this information. Source: Vermont Department of Health, Vital Statistics System.

Percent low birthweight: Babies with birthweights under 5.5 pounds, as a percent of all babies with reported birthweights. Source: Vermont Department of Health, Vital Statistics System.

Percent of births where families receive a new baby visits: A home-visit is offered to nearly every new family; some families decline, or choose to receive information through some other route. Numerator is the estimated number of families with new babies, in the Agency of Human Services District, who received face-to-face information on community supports and services; denominator is the number of births recorded for residents of the Agency of Human Services District. Visits include those offered through the Healthy Babies program (during the calendar year named), and through regional Success By Six initiatives (“Welcome Baby” visits) (during the state fiscal year beginning July 1 of the named year). Some families may inadvertently be counted more than once. Sources: Vermont Department of Health; Vermont Agency of Human Services, Planning Division.

Infant mortality: Infants who die before 1 year of age; rate is per 1000 births. Source: Vermont Department of Health, Vital Statistics System.

Percent of people receiving welfare (Reach Up): Caseloads as of January, as a percent of the estimated population in each age-group. Sources: Vermont Department for Children & Families; Vermont Department of Health, Population Estimates.

Rate of injuries resulting in hospitalization: Hospital discharges with “injury” as the principal diagnosis. Rate is per 1000 population. Does not include injuries treated in emergency rooms or other outpatient settings. Sources: Vermont Hospital Discharge Datasets; Vermont Department of Health, Population Estimates.

Percent of WIC-enrolled children overweight or at risk: Percent of children ages 2-4 enrolled in the Special Supplemental Nutrition Program for Women, Infants, and Children (“WIC”) whose weight-and-height put them in the “overweight” category (95th or higher percentile of Body Mass Index), or “at risk for overweight” category (between the 85th and 95th percentiles). In Vermont, approximately 40 percent of children in this age group are enrolled in WIC. Source: Vermont Department of Health, Pediatric Nutrition Surveillance data.

Child mortality: Deaths of children aged 1 through 14 years. Rate is per 1000 population. Source: Vermont Department of Health, Vital Statistics System.

Immunizations at kindergarten entry: Estimated percent of all entering kindergartners who present evidence of having met the required immunization schedule (DTP 3, Polio 3, MMR 2). Beginning with the 1999-00 school year, two doses of measles vaccine are required; mumps and pertussis vaccines are not required. School data refer to all enrolled students, including those who do not reside in the towns covered by the supervisory union. Data are for the school year ending in the calendar year named. Source: Vermont Department of Health, Immunization Program.

First-grade screening for vision and hearing problems: First-graders reported screened by Vermont public schools, as a percent of reported enrollment. State law requires schools to assure that vision and hearing screening has taken place in grades 1-3, 5, 7, and 9, and vision screening in grade 10. School data refer to all enrolled students, including those who do not reside in the towns covered by the supervisory union. Data are for the school year ending in the calendar year named. Source: Vermont Department of Education, Health Services Screening Report.

Kindergartners ready for school: Children were rated by kindergarten teachers 4-6 weeks into the school year on four dimensions of readiness for school. Each dimension was measured by multiple items; percent of children counted for this indicator were those rated as “practicing” or “performing independently” on each item within the dimensions. Not all kindergarten teachers in all school districts participated in the survey; thus, the state figures are aggregate data only, and are not necessarily representative of the state as a whole. School data refer to all enrolled students, including those who do not reside in the towns covered by the supervisory union. Data are for the school year ending in the calendar year named. Source: Vermont Agency of Human Services and Vermont Department of Education, “Ready Kindergartners” Questionnaire.

“Ready Schools”: Principals of schools with kindergartens provided information about school resources and practices related to kindergarten children and their families. In addition, kindergarten teachers provided information about their professional preparation and their access to a number of support services. These responses were grouped into four dimensions of “ready schools.” Members of the Vermont Early Childhood Workgroup developed standards for each dimension, based on weights assigned to specific item-responses. Data as reported show schools’ responses as a percent of the standard on each dimension. Not all kindergarten teachers and principals in all school districts participated in the survey; thus, the state figures are aggregate data only, and are not necessarily representative of the state as a whole. School data refer to all enrolled students, including those who do not reside in the towns covered by the supervisory union. Data are for the school year ending in the calendar year named. Source: Vermont Agency of Human Services and Vermont Department of Education, “Ready Schools” Teacher and Principal Questionnaires.

School attendance rate: Percent of school days attended, averaged across all students in all schools within the supervisory union. School data refer to all enrolled students, including those who do not reside in the towns covered by the supervisory union. Data are for the school year ending in the calendar year named. Source: Vermont Department of Education.

Percent of 2nd graders meeting standard on Developmental Reading Assessment: Students meeting or exceeding the criterion for reading success by Spring of second grade. School data refer to all enrolled students, including those who do not reside in the towns covered by the supervisory union. Data are for the school year ending in the calendar year named. Source: Vermont Department of Education.

English/Language Arts New Standards performance: The New Standards Reference Exams are nationally-recognized tests that measure student performance against standards adopted by the Vermont Board of Education. Students' performance, relative to the standard, is scored, in each subject area, as "little evidence of achievement," "below the standard," "nearly achieved the standard," "achieved the standard," or "achieved the standard with honors." Performance reported on here is the percentage of test-taking students who "achieved the standard" or "achieved the standard with honors." School data refer to all enrolled students, including those who do not reside in the towns covered by the supervisory union. Data are for the school year ending in the calendar year named. Source: Vermont Department of Education.

Math New Standards performance: The New Standards Reference Exams are nationally-recognized tests that measure student performance against standards adopted by the Vermont Board of Education. Students' performance, relative to the standard, is scored, in each subject area, as "little evidence of achievement," "below the standard," "nearly achieved the standard," "achieved the standard," or "achieved the standard with honors." Performance reported on here is the percentage of test-taking students who "achieved the standard" or "achieved the standard with honors." School data refer to all enrolled students, including those who do not reside in the towns covered by the supervisory union. Data are for the school year ending in the calendar year named. Source: Vermont Department of Education.

Percent students receiving special education: Students identified, as of December 1, as eligible for Individual Education Plans (IEPs) under special education statutes. School data refer to all enrolled students, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Education.

Estimated percent high school completion: The number of graduates from a high school class (e.g., class of 2002) as a percent of (that number plus the reported dropouts from the class that year and for each of the three previous years. This methodology does not account for students who may drop out and re-enroll in either the same school or another the following year. School data refer to all enrolled students, including those who do not reside in the towns covered by the supervisory union. Data are for the school year ending in the calendar year named. Source: Vermont Department of Education.

Percent children in poverty: Related children (ages 0-17) in households earning less than the federal poverty threshold (this averaged \$12,674 for a family of four in 1989, and \$17,105 in 1999). Source: U.S. Bureau of the Census, Tape STF3.

Percent children in families receiving Food Stamps: There is currently no reliable measure of child poverty at a sub-state level. Families eligible for Food Stamps are those with incomes 130% of federal poverty level, or less. Not all eligible families receive Food Stamps. Enrollments may be sensitive to differences in public awareness of the program. Caseload data are for January of the year named. Source: Vermont Department for Children & Families.

Percent child support paid: Annual total amount of payments received, as a percent of annual total amount payable for cases with current or arrears obligations. Source: Vermont Department for Children & Families.

Percent parentage established for out-of-wedlock child support cases: Data refer to cases where parentage has been legally established, as a percentage of current out-of-wedlock cases. Because parentage may be established at any time, percentage may exceed 100. Source: Vermont Department for Children & Families.

Child abuse and neglect: Substantiated victims of physical abuse, sexual abuse, or neglect, aged 0 through 17, per 10,000 population. Because the substantiation status of abuse/neglect reports may change over time, data here are adjusted to reflect reported state totals of substantiated victims, as of March for the preceding year. Sources: Vermont Department for Children & Families; Vermont Department of Health, Population Estimates.

Out-of-home placements: Counts include persons not living with biological or adoptive parents and not living independently. Includes placements made by the Departments of Corrections, Developmental and Mental Health Services, Education, and Children & Families. Residence for Education placements is determined by parents' residence, for DDMHS placements by zip code (zip codes that cross county boundaries are resolved in favor of the county with the greatest population), for Children & Families by person's town of residence, and for Corrections by court of sentencing. State data include cases for which county of residence could not be determined. Counts are as of June. Persons may be counted more than once if served by multiple systems. Rates are per 1000 population.

Sources: Vermont Department of Corrections, Vermont Department for Children & Families, Vermont Department of Education, Vermont Department of Health, Population Estimates.

Average number of moves within the child substitute care system: For cases closed within the year, not counting the initial removal from and return to home, or planned short-term visits. Because these are averages, the data are sensitive to individual cases with unusually high or low numbers of moves. Source: Vermont Department for Children & Families.

Percent students participating in youth programs: Surveyed students who reported spending 1 or more hours per week in an average week in clubs or organizations outside of school (not including sports). Data refer to all surveyed students, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Health, Office of Alcohol & Drug Abuse Programs; and Vermont Department of Education, *Youth Risk Behavior Survey*.

Percent youth volunteering in their community: Surveyed students who reported spending 1 or more hours per week in an average week helping other people without getting paid (such as helping out at a hospital, daycare center, food shelf, youth program, community service agency, or doing other things) to make their community a better place for people to live. Data refer to all surveyed students, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Health, Office of Alcohol & Drug Abuse Programs; and Vermont Department of Education, *Youth Risk Behavior Survey*.

Percent students smoking cigarettes: Percent of surveyed students reporting they smoked cigarettes within the past 30 days. Not all schools participated in the survey. Data refer to all surveyed students, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Health, Office of Alcohol & Drug Abuse Programs; and Vermont Department of Education, *Youth Risk Behavior Survey*.

Percent students using alcohol: Percent of surveyed students reporting they had one or more drinks of alcohol within the past 30 days. Not all schools participated in the survey. Data refer to all surveyed students, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Health, Office of Alcohol & Drug Abuse Programs; and Vermont Department of Education, *Youth Risk Behavior Survey*.

Percent students using marijuana: Percent of surveyed students reporting they smoked marijuana within the past 30 days. Not all schools participated in the survey. Data refer to all surveyed students, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Health, Office of Alcohol & Drug Abuse Programs; and Vermont Department of Education, *Youth Risk Behavior Survey*.

Teen sexually-transmitted diseases: Reported incidence of chlamydia, gonorrhea, and syphilis among 15- to 19-year olds. Rate is per 1000 population. Source: Vermont Department of Health, Epidemiology Division, and Population Estimates.

Young teen pregnancy: Includes resident births, abortions, and fetal deaths reported to the Vermont Department of Health for women aged 15 through 17 years; does not include abortions obtained out of state. Rate is per 1000 female population aged 15-17. Source: Vermont Department of Health, Vital Statistics System.

“Unmanageable” children in custody: Average daily number of “Children in Need of Supervision” in VT Department for Children & Families custody. Rate is per 10,000 children ages 10 through 17 years. As of July 1, 1996, children ages 16 and 17 may not enter custody as “unmanageables.” Sources: Vermont Department for Children & Families; Vermont Department of Health, Population Estimates.

Court dispositions for delinquency: Delinquency cases filed in Family Court within the fiscal year, per 10,000 children aged 10-17. Delinquency cases may be disposed of by a finding of delinquency, a dismissal or withdrawal of the petition, a dismissal following satisfactory completion of diversion, or a transfer to criminal court. Residence information allows identification by county, not supervisory union area. Sources: Vermont Office of the Court Administrator; Vermont Department of Health, Population Estimates.

Delinquents in custody: Average daily number of delinquent children in VT Department of Social & Rehabilitation Services custody. Rate is per 10,000 children aged 10 through 17. Sources: Vermont Department of Children & Families; Vermont Department of Health, Population Estimates.

Teen violent deaths: Deaths of 15- to 19-year-olds with cause reported as injuries, suicide, or homicide. Rate is per 1000 population aged 15 through 19. Source: Vermont Department of Health, Vital Statistics System.

Percent high school seniors with aspirations for education, vocational training or employment: Percent of reporting high school seniors indicating post-graduation plans for 4-year or 2-year college, vocational /technical training, or full-time employment. Source: Vermont Department of Education.

Percent of graduating high school seniors who continue their education within six months: Estimated proportion of the graduating class of the year named who enter post-secondary education. Source: Vermont Student Assistance Corporation, *Senior Survey*.

“New Families at Risk”: Defined as the percent of first births that are to unmarried women younger than 20, with less than 12 years education. According to national statistics, families with all 3 “risk factors” (unmarried status, teenage, little education) are 10 times more likely to live in poverty than those with none of the 3 factors. Source: Vermont Department of Health, Vital Statistics System.

Teen non-violent deaths: Deaths of 15- to 19-year-olds from all causes except injuries, suicide, or homicide. Rate is per 1000 population age 15 through 19. Source: Vermont Department of Health, Vital Statistics System.

Percent of adults who smoke cigarettes: Percent of adults (age 18+) who report they are current smokers. Source: Vermont Department of Health, Vermont Behavioral Risk Factors Surveillance System.

Percent of adults who are “binge” drinkers: Percent of adults (age 18+) who report they consumed 5 or more alcoholic drinks on one occasion, at least once in the past 30 days. Source: Vermont Department of Health, Vermont Behavioral Risk Factors Surveillance System.

Suicide, age 18 years and older: Deaths reported as suicides. Rate is per 100,000 population over 18 years of age. Source: Vermont Department of Health, Vital Statistics System.

Percent people above poverty level: Persons with income above federal poverty level, as a percent of all persons for whom poverty level is determined. Source: U.S. Bureau of the Census.

Average median family income: Median income by town, averaged across the towns comprising the supervisory union area. The median is the income-level where half the incomes are above, and half are below, that level. Source: U.S. Bureau of the Census.

Average annual wage: Includes private-sector jobs covered by unemployment compensation (does not include self-employment). Figure covers hourly workers, salaried workers, and those paid on commission; includes part-time, full-time, and overtime wages. Source: Vermont Department of Labor.

Rate of job creation: The percent change from the previous year in the total number of private sector jobs covered by unemployment compensation (does not include self-employment). Source: Vermont Department of Labor.

Rate of employment: 100 minus the annual average unemployment rate (percent). Source: Vermont Department of Labor.

Percent of population aged 65+ in poverty: Individuals ages 65 years and older with income below the federal poverty level, as a proportion of all individuals in that age-group for whom poverty status is determined. Source: U.S. Bureau of the Census.

Percent of population aged 65+ at risk for depression: The percent of people in this age group whose health survey responses indicate they are at risk for depression. Source: Vermont Department of Health, Behavioral Risk Factors Surveillance System.

Rate of adult abuse/neglect: Victims reported to Adult Protective Services, Vermont Department of Aging & Disabilities, of persons aged 60 years or older, or those 18 and older with diagnosed disabilities, found to have been victims of abuse, neglect, or exploitation. Rate is per 10,000 population aged 18 and older. Data are by state fiscal year. Sources: Vermont Department of Disabilities, Aging & Independent Living; Vermont Department of Health, Population Estimates.

Percent successful job placements among consumers of Vocational Rehabilitation services: Rate is the percent of all Vocational Rehabilitation cases closed within the year named, that received services that resulted in job placements. Source: Vermont Department of Disabilities, Aging & Independent Living, Division of Vocational Rehabilitation.

Balance of institutional and home & community-based ("waiver") options for long-term care: The proportion of Medicaid-funded nursing home beds, versus slots in home and community-based care settings, for those requiring long-term care services. Source: Vermont Department of Disabilities, Aging & Independent Living.

Percent of youth who report they feel valued by their community: Surveyed youth who “agree” or “strongly agree” with the statement, “In my community, I feel like I matter to people.” Not all schools participated in the survey. Data refer to all surveyed students, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Health, Office of Alcohol & Drug Abuse Programs, and Vermont Department of Education, *Youth Risk Behavior Survey*.

Percent of youth who report they have an adult they can usually turn to for help and advice: Surveyed youth who answered affirmatively to this item. Not all schools participated in the survey. Data refer to all surveyed students, including those who do not reside in the towns covered by the supervisory union. Source: Vermont Department of Health, Office of Alcohol & Drug Abuse Programs, and Vermont Department of Education, *Youth Risk Behavior Survey*.

Court petitions filed for “Relief From Domestic Abuse”: A plaintiff, with the assistance of a court worker, can file an affidavit at any time of day or night. Not all filings result in a signed court-order. Prior to fiscal year 1991, cases were filed in District or Superior Court; subsequent cases were filed in Family Court. Rate is per 10,000 population. Sources: Vermont Office of the Court Administrator; Vermont Department of Health, Population Estimates.

Rate of violent crime: Incidents of homicide, rape, aggravated assault, and robbery reported by local law enforcement agencies to the Vermont Department of Public Safety. Rate is per 100,000 population. Source: Vermont Department of Public Safety, *Vermont Crime Report*.

Rate of sexual assault: Reported rapes and other sexual offenses: Offenders and victims may be of any age. Many such crimes are unreported. Rate is per 1,000 population. Source: Vermont Department of Public Safety, *Vermont Crime Report*.

Percent living in affordable housing: Percent of households paying less than 30 percent of gross income for housing costs (including rent or mortgage, taxes, and utilities). Source: U.S. Bureau of the Census.

Percent met need for child care: Number of regulated child care slots as a percent of need for child care. Slots are estimated by capacity figures as of summer of the named year. For 1994, based on estimates of the number of two-earner and working single-parent households, need was estimated at 50 percent of the population aged 0-12; for 1998-02, need was estimated at 55 percent. Sources: Ad Hoc Task Force on Child Care, *Investing in Vermont's Future: Strategies for Strengthening Vermont's Child Care Infrastructure*, 1995; Vermont Department for Children & Families.

40 Developmental Assets

EXTERNAL ASSETS

SUPPORT

1. *Family support*: Family life provides high levels of love and support
2. *Positive family communication*: Parents and child communicate positively; child is willing to seek parents' advice and counsel
3. *Other adult relationships*: Child receives support from three or more non-parent adults
4. *Caring neighborhood*: Child experiences caring neighbors
5. *Caring school climate*: School provides a caring, encouraging environment
6. *Parent involvement in schooling*: Parents are actively involved in helping child succeed in school

EMPOWERMENT

7. *Community values youth*: Child perceives that community adults value youth
8. *Youth given useful roles*: Youth are given useful roles in community life
9. *Community service*: Child gives one hour or more per week to serving in one=s community.
10. *Safety*: Child feels safe in home, school, and neighborhood

BOUNDARIES AND EXPECTATIONS

11. *Family boundaries*: Family has clear rules and consequences, and monitors whereabouts
12. *School boundaries*: School provides clear rules and consequences
13. *Neighborhood boundaries*: Neighbors would report undesirable behavior to family
14. *Adult role models*: Parent(s) and other adults model pro-social behavior
15. *Positive peer influence*: Child's best friends model responsible behavior
16. *High expectations*: Both parents and teachers press child to achieve

TIME

17. *Creative activities*: Involved three or more hours per week in lessons or practice in music, theater, or other arts
18. *Youth programs*: Involved three hours or more per week in sports, clubs, or organizations at school and/or community organizations
19. *Religious community*: Involved one or more hours per week
20. *Time at home*: Out with friends "with nothing special to do," two or fewer nights per week

INTERNAL ASSETS

EDUCATIONAL COMMITMENT

- 21. *Achievement motivation*: Child is motivated to do well in school
- 22. *School performance*: Child has B average or better
- 23. *Homework*: Child reports one or more hours of homework per day
- 24. *Bonding to school*: Child cares about her/his school
- 25. *Reading for pleasure*: Child reads for pleasure three or more hours per week

VALUES

- 26. *Caring*: Child places high value on helping other people
- 27. *Equality and social justice*: Child places high value on promoting equality and reducing hunger and poverty
- 28. *Integrity*: Child acts on convictions, stands up for her/his beliefs
- 29. *Honesty*: Child “tells the truth even when it is not easy”
- 30. *Responsibility*: Child accepts and takes personal responsibility
- 31. *Restraint*: Child believes it is important not to be sexually active or to use alcohol or other drugs

SOCIAL COMPETENCIES

- 32. *Planning and decision-making*: Child has skill to plan ahead and makes choices
- 33. *Interpersonal competence*: Child has empathy, sensitivity, and friendship skills
- 34. *Cultural competence*: Child has knowledge of, and comfort with, people of different racial backgrounds
- 35. *Resistance skills*: Child can resist negative peer pressure
- 36. *Peaceful conflict resolution*: Child seeks to resolve conflict non-violently

POSITIVE IDENTITY

- 37. *Personal control*: Child feels she/he has control over “things that happen to me”
- 38. *Self-esteem*: Child reports high self esteem
- 39. *Sense of purpose*: Child reports “my life has a purpose”
- 40. *Positive view of personal future*: Child is optimistic about his/her personal future
